

What is the Omeo?

The Omeo is a dynamic, two wheeled mobility device that provides movement through balance. It has a wide range of use, manoeuvring with ease and grace through everyday crowds and shared spaces, navigating tight areas, and beyond – to the wide and open rugged terrain of beaches and hill trails.

Features of the Omeo to consider:

- ★ Constant micro pressure relief provided by the action of maintaining balance
- ★ Zero Turn – The Omeo turns on its own axis
- ★ Inside/Outside use
- ★ Easily manoeuvred when riderless
- ★ Compact unit at 650mm wide with standard tyres
- ★ Transportable in many small vehicles with the seat back removed and footplate retracted
- ★ Range/Scope – max speed of 20km/hr and can be programmed at factory to meet speed restrictions* – max range of up to 50km travel
- ★ Terrain – capable on a wide range of complex surface and slope
- ★ USB ports
- ★ Frees up the hands
- ★ Open seat access for easier transfers
- ★ Three steering options-seat steer, joystick or handle grip

** For example, the Omeo is factory set to 10km/hr to comply with the Local Government Laws in Australia.*

Who would benefit from the Omeo?

When determining the suitability of the Omeo for a client it is important to consider each individual's personality, cognitive abilities (level of concentration, alertness, memory, orientation and decision making) and their ability to learn and maintain new skills, as well as their physical abilities and medical parameters.

The machine / person interface through the active seat control allows people with a wide range of abilities to successfully and independently control the Omeo. To this date the Omeo has been successfully trialled and purchased by a community of people living with a wide variety of diagnoses, including but not limited to people living with Multiple Sclerosis, Amputations and Spinal Cord injuries at varying levels (paraplegia, tetraplegia). Our client's success in being able to independently balance and control the Omeo via the seat movement demonstrates the Omeos adaptability to suit people with a wide range of abilities.

Trial and Training

Omeo Technology agents provide managed trials and comprehensive individualised training sessions for clients in partnership with their support team.

Benefits of Omeo use as reported by our client community:

- 👍 Moving in space
